| Practice Page |  |  |  |
|---------------|--|--|--|
| 1.            | 1. Fill in the blank spots for the definition of a variable: |  |  |
|               | A variable is a, or other<br>don't know.                     | , that is used to replace a whose value we |  |
| 2.            | 2. Fill in the blank spots for the definition of a constant: |  |  |
|               | A constant is a in an  |  |  |
| 3.            | 3. Fill in the blank spots for the first algebraic rule:     |  |  |
|               | Remove from the<br>math operation of the constant.           | side of the equation by performing the     |  |
| 4.            | 4. Fill in the blank spots for the second algebraic rule:    |  |  |
|               | Whatever you do to   | of theyou have to do to the                |  |
| 5.            | Solve for the unknown variable:                              | 7. Solve for the unknown variable:         |  |
|               | 43 = T -13   | 5N = 225                                   |  |
| 6.            | Solve for the unknown variable:                              | 8. Solve for the unknown variable:         |  |
|               | X + 23 = 419   | P ÷ 18 = 3                                 |  |
